

Will it work for me?

If you want optimal results from your LASIK surgery, or have had difficulty adjusting post-surgery, RevitalVision is for you.

Does the program involve surgery or medications?

No, RevitalVision does not require any surgery or prescriptive medication.

How much will my vision improve?

Most customers experience an improvement in contrast sensitivity by at least 100%.

When can I start?

Anytime after LASIK. Whether your surgery was a week ago or several years ago, RevitalVision may improve your results.

How long do the results last?

The program uses neural training to improve your vision. Just like learning to walk, riding a bicycle and learning to swim have long lasting effects, so does RevitalVision.

Is it safe?

Yes. Prior to being released for commercial use, RevitalVision was researched and tested for over 20 years. There are no known risks, side effects or complications associated with this program.

ENHANCING VISION

After LASIK

Optimal Results After LASIK

To fine-tune the results of LASIK (refractive surgery), RevitalVision trains your brain to see better without additional surgery. The Post-LASIK Therapy helps improve the communication between your eyes and your brain.

- **Ability to see better** - in low light conditions
- **Enhanced vision** - while driving and reading
- **Reduce** - halos, starbursts and glare while driving or seeing at night
- **Increase contrast sensitivity** - enhancing your ability to discern objects that blend into the background, like a menu in a dimly lit restaurant
- **Increase visual acuity** - improving your ability to see and distinguish fine details, which is measured with an eye chart

Dramatically Improve Your Vision

Most customers experience improvement in visual acuity and increase contrast sensitivity by at least 100%.

The Science Behind RevitalVision

Blurred vision can be improved by enhancing brain processing. RevitalVision neural training is clinically and scientifically proven, unlike eye exercise programs that focus on relaxing eye muscles. During training sessions, a series of visual tasks and repetitive images train the brain and improve visual processing. RevitalVision analyzes performance and continuously adjusts the individually customized training sessions to substantially improve vision.

The world's only proven therapy to dramatically improve vision after LASIK

Physical Therapy for Your Eyes

Thousands of customers and clinical trial participants that completed the program have experienced improved eyesight and quality of life.

About the program:

- **20 training sessions** - completed at home on a computer
- **20 minutes on average** - for each training session
- **Customized** - to your pace and visual ability
- **Professionally monitored** - by your RevitalVision™ Personal Vision Specialist

RevitalVision includes a quick start guide, manual, cd, and mouse extension cable. Should you have any questions, your Personal Vision Specialist will help guide the installation process.

Getting Started

Talk to your eye care professional to purchase or learn more about RevitalVision. For more information visit www.RevitalVision.com.

“When I went to my eye doctor for my final post-training exam, I could read the smallest letters on the eye chart: EDFCZP. I had gained a whole line!”
