

### **Will it work for me?**

If you feel like you need or have started using reading glasses or bifocals, RevitalVision is for you.

### **Does the program involve surgery or medications?**

No, RevitalVision does not require any surgery or prescriptive medication.

### **How much will my vision improve?**

The average improvement experienced is more than two lines on the eye chart.

### **How long do the results last?**

Just like learning to walk, riding a bicycle and learning to swim have long lasting effects, so does RevitalVision.

### **Is it safe?**

Yes. Prior to being released for commercial use, RevitalVision was researched and tested for over 20 years. There are no known risks, side effects or complications associated with this program.

# Better Vision WITHOUT Reading Glasses

## Natural Effects of Aging

The natural effects of aging causes a decline in near vision resulting in the need for reading glasses or bifocals. This condition is known as presbyopia.

## Reduce or Eliminate Your Need For Reading Glasses

Thousands of customers and clinical trial participants that completed the program have experienced improved eyesight and quality of life, including:

- **Reading smaller print** - on a newspaper, menu, or computer screen
- **Reading better** - in low light conditions
- **Seeing objects** - better at night
- **Reducing or eliminating** - the need for reading glasses

The average improvement experienced is more than two lines on an eye chart.

## The Science Behind RevitalVision

Blurred vision from the eyes can be improved by enhancing brain processing. RevitalVision neural training is clinically and scientifically proven, unlike eye exercise programs that focus on relaxing eye muscles. During training sessions, a series of visual tasks and repetitive images train the brain and improve visual processing. RevitalVision analyzes performance and continuously adjusts the individually customized training sessions to substantially improve vision.

## Improve Vision by an Average of Two Lines on the Eye Chart

RevitalVision trains your brain to see better without additional surgery, enhancements, drugs or side-effects.

About the program:

- **20 training sessions** - completed at home on a computer
- **20 minutes on average** - for each training session
- **Customized** - to your pace and visual ability
- **Professionally monitored** - by your RevitalVision™ Personal Vision Specialist

*RevitalVision includes a quick start guide, manual, cd, mouse extension cable, and training glasses. Should you have any questions, your Personal Vision Specialist will help guide the installation process.*

## Getting Started
